

Understanding business, understanding processes.
The business game for real business expertise.

CONCEPT INTERACTIVE LEARNING, SUSTAINABLE SUCCESS

In SysTeamsBusiness, participants take on the role of company management and compete against each other in a changing market. This allows them to experience how a company operates as a system and how strategic and operational decisions are interrelated.

TARGET GROUP WHO BENEFITS FROM SysTeamsBusiness

Students combine theory and practice! Experience management from the start-up idea to the balance sheet.

Trainers and teachers use the simulation game because it makes entrepreneurship tangible, live in team seminars or digitally for exam preparation.

Companies, organizations, and associations promote cross-functional thinking, new perspectives, and strategic competence without any risk.

BENEFIT GET READY FOR THE COMPETITION

Participants experience all business processes, from order entry to tax payment, as an integrated system. They learn to make decisions in every area of the company and experience the real-time consequences of these decisions.

TRY IT NOW FOR FREE: Play a full fiscal year free of charge and try SysTeamsBusiness with no obligation. This will prepare you for the upcoming team competition.

HOW YOU CAN USE SysTeamsBusiness

Hands-on business administration for schools and universities.

SysTeams Business is already being used successfully by many educational institutions in Germany and abroad. It complements curricula by providing a practical simulation game that is easy to understand, motivating and directly applicable.

Accounting & Controlling — First-hand experience not just Comprehension.

First-hand experience not just Comprehension. SysTeamsBusiness uses realistic scenarios to provide a comprehensive understanding of business processes, from booking to profit determination. Accounting and Controlling become lively and tangible.

An introduction to management for self-learners and seminars

Whether it is taken as a class, block seminar or individual course, SysTeamsBusiness is an ideal introduction to management. Thanks to its modular teaching methods, certified trainers and flexible design, it can be adapted to any learning context.

HOW OUR CUSTOMERS USE SysTeamsBusiness

"I use this simulation game to teach accounting in a practical way. It makes operational decision-making processes tangible and actively involves participants in bookkeeping and balancing. I use the strategic decisions in SysTeamsBusiness to promote entrepreneurial thinking and action."

Heiko Hammer,
Managing Director, priME Academy AG

„Think entrepreneurially — actively shape the future!“

Action-oriented. Practical. Relevant for the future.

"Through SysTeamsBusiness, I learned where a company's money comes from and where it goes. Understanding the balance sheet, profit and loss statement, and cash flow has given me a better grasp of economic relationships and enables me to make informed decisions, which is a valuable experience for me as a project engineer!"

Dipl.-Ing. Klaus Danielewski,
Managing Director of Checkpoint Future GmbH

Consulting and training

Qualification of executives, coaches, investment steering groups and project teams

"SysTeamsBusiness introduces us to the theories of external and internal accounting. The computer game and board game were pretty cool because we finally understood what accounting is all about."

Team 2: Sina Schmid, Elly Wolf, ProGenius
Private Corporate Schools, Böblingen

Economics in a playful way — with relevance for life.

Fun and learning success with results — exam preparation in economics with dedicated coaches
